

# **FISCAL NOTE**

## **SB 1051 - HB 1775**

February 28, 2005

**SUMMARY OF BILL:** Requires inspection of historic power boilers before exhibition and provides that the Chief Inspector or authorized representative will issue a condition report to the owner and management of any exhibition in which the boiler is to be operated about the condition of the boiler. Management of the exhibition is to notify the Department of Labor and Workforce Development about the decision to operate the boiler at an exhibition and management of the exhibition is responsible for any injuries that result from the operation of the boiler approved for use by management.

### **ESTIMATED FISCAL IMPACT:**

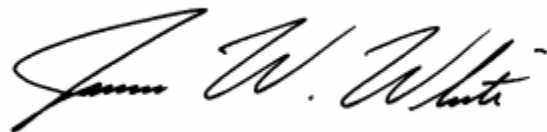

#### **Increase State Expenditures – Not Significant**

Assumptions:

- Historic boilers are currently inspected on a biannual basis during normal working hours.
- Events that have historic boilers may be held on weekends and holidays and the Department of Labor and Workforce Development would request that such inspections be made on a regular work day before the weekend or holiday in order to avoid overtime pay for boiler inspectors.

### **CERTIFICATION:**

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.

A handwritten signature in black ink, appearing to read "James W. White". The signature is fluid and cursive, with the first name "James" written in a larger, more prominent script than the last name "White".

James W. White, Executive Director
